
Modelling Clay Recipe

Ingredients:

- 4 cups flour
- 1 1/2 cups salt
- 1 1/2 cups water

Directions:

1. Mix together flour and salt in a bowl.
2. Add water gradually to flour mixture and combine.
3. Continue to knead until well combined into a dough.
4. Mould, squish and sculpt clay. Try rolling it out and make animal, car, or dinosaur tracks. Use cookie cutters to cut out different shapes. It's also great for making foot or handprints.
5. Allow to dry for 48 hours or longer for bulkier projects.
6. Once dry you can paint your finished project.
7. Store unused clay in an airtight container in the fridge. Bring to room temperature before using.
